DETAILED ACTION

1. This action is in response to applicant's response received on 7/2/03.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6, 9-12 and 14-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Althaus (5,447,084).

Althaus discloses (Fig. 1-7) the invention including a plastic body 1 including a leading edge and a trailing edge, a series of guard ribs (11, 111 and 211), cutting blades 2, cutting edges 3, a guard bar 18, a cap 20 and a lubrication strip 21.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3724

5. Claims 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Althaus in view of King et al.

Althaus discloses the invention substantially as claimed except for a series of depressions and projections. However, King teaches the use of a series of depressions 44 and projections 40 for the purpose of increasing the tension on the skin and releasing an amount of shaving cream to the surface being shaved. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Althaus's guard bar by providing the series of depressions and projections as taught by King in order to obtain an increase in the tension on the skin and release more an amount of shaving cream to the surface being shaved.

Response to Arguments

6. Applicant's arguments have been fully considered but they are not persuasive. Applicant argues that Althaus does not disclose "a series of guard ribs integrally molded with the plastic body". However, Althaus teaches the series of guard ribs *integrally molded* with the plastic body as per definition (to give a shape to)(see Merriam Webster's Collegiate Dictionary 10 edition). In order to overcome the rejection, the structure of the guard ribs are formed from the same material as the body needs to be incorporated in the claims.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3724

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
